

Briefly Local Export Test

Verify local HTML and PDF export from the Briefly MCP pipeline.

CATEGORY	AI Tool
STAGE	Planning
STATUS	Draft
OWNER	Codex
CONFIDENTIALITY	Internal

Background & Problem

Make Briefly documents portable across MCP clients.

The user needs confidence that local export works before publishing.

Goal / Success Criteria

Produce a real HTML file and a real PDF file from the same Briefly document.

- Validate MCP export
- Validate local PDF rendering

Both files exist and contain non-empty output.

Deliverables & Scope
